## AWEX Commentary

Another steady week in the wool market this sale with the benchmark AWEX Eastern Market Indicator (EMI) firming 6 cents over the two days. The EMI is now only 3 cents shy of the 1300 cent level (1297 cents) and is at its highest level in 9 months. Just under 30,000 bales were offered nationally for the week making it the second smallest series for the season. A non-sale week in Fremantle contributed to the reduced offering. Wednesday was initially fairly flat and only minor movements were recorded. The better types remained the focus and lower spec types were fairly patchy, particularly in the finer microns when there were larger quantities. Thursday opened up on a more positive footing and continued to improve over the day. More consistent results were evident and discounting was reduced, and the final hour resulted in strong completion to close out the sale. Week-on-week results for Merino Fleece ranged between unchanged and 10 cents higher with the mid-microns enjoying the strongest competition. The smallest offering of Merino Skirtings for the season generally followed the movements in the fleece market this week, finishing the week 10 to 20 cents higher than when compared to the previous sale. The second day of selling saw a noticeable reduction in the discounts applied to shorter/faultier lots, closing the gap between these and the better style/spec lots. A limited offering of Crossbreds added to recent gains, rising 10 to 20 cents for the week. Fremantle resumes sales next week as part of a national total of 33,466 bales.
