AWEX Commentary									

Strong buyer interest has pushed the AWEX-EMI to a 49 cent rise, its biggest increase in seventeen months. The EMI close at 1363 cents, also a seventeen-month high. As noted last week volumes have been relatively stable and this sale followed similar pattern with 47,000 bales on offer. The market started off slowly when Melbourne sold in isolation on Tuesday; the small Australian based catalogues were only slightly dearer before a late NZ-catalogue found better support and set the tone for the rest of the week. Wednesday initially jumped 20 cents higher but quickly gathered momentum to close 40 cents higher for most of the Merino microns. The finer microns attracted the most support and some types were as much as 50 cents dearer. Thursday repeated the pattern with the finer microns (<20) again the centre of buyer attention and making further increases of 30 cents. By the end of the week the finer microns were around 70 cents higher than the previous sale and many of the Micron Price Guides were at 5-year highs. Merino Skirtings tracked a similar line, closing 50 cents higher fc the sale. Crossbreds were mixed, initially gaining ground before a lacklustre finish. 26-microns finished lower but other microns firmed 10 to 20 cents. Merino Carding types maintained their renewed interest, rising 20 to 50 cents. Market strength increased the seasonal gross turnover to more than \$1 billion dollars, reaching this figure 3 weeks sooner than last season. Next week is currently estimated at 48,603 bales.
