AWEX Commentary										

More than 55,000 bales were offered this week, the largest national total since January and the final sale of the 2016 calendary year. Unlike in recent weeks where the market has been subject to large price increases or corrections, Week 24 saw a gradual increase in prices across all centres on all selling days, although most price increases were experienced during Wednesday's selling. After steady price rises throughout the sale, all merino sectors generally finished the week 10 to 20 cents above levels recorded in the previous sale.

The skirting market performed better than the fleece in Sydney and Fremantle, on average 20 cents dearer for the week, while Melbourne was firm unchanged compared to the previous week.

It was the largest offering of Crossbreds in 2 years and 34% larger than last week. Prices drifted lower and poorly prepared lots in particular were neglected, then increasingly discounted as the sale progressed. Prices were generally discounted between 5 and 20 cents, with the coarser end least affected.

The oddment market was one of small mixed movements, small price rises and increases saw an average decrease of 5 cents in the Eastern Merino Carding Indicators and a 2 cent increase in the Western Region.

The EMI finished the 2016 calendar year 90 cents higher (+7.1% YOY) at 1355 cents, the highest calendar-year closing figur on record. Turnover for 2016 was just over 2.5 billion dollars (AUD), the largest amount since 2002 (2.9 billion during that year when volume was 62% higher). Average dollars per bale in 2016 (excl. NZ) was \$1478, the highest on the AWEX database (since '97).

Sales resume on the week beginning the 9th of January, 2017 with selling in Sydney, Melbourne and Fremantle.
